MOORINGS *474 PC*

Built by Robertson & Caine to Moorings Specifications

Conceived between The Moorings, international yacht builders Robertson & Caine, and architects Morrelli & Melvin, the Moorings 474 PC is a cutting edge design and merges the best features learned from customer expectations and many years of yacht design. This brand new design is an ideal cruising platform boasting 3 deck levels with large functional living spaces for friends and family to fully enjoy. With shoal draft and her propellers protected by a front skeg and tunnel hull design, this yacht boasts ease of handling, versatility and a range of design features and amenities to ensure a memorable on-board experience. On the fly bridge, a centrally positioned helm station offers excellent visibility on all corners of the yacht for ease of maneuvering. Powered by 2 very reliable straight drive 150HP Cummins diesel engines, and coupled with an efficient hull based on optimization studies from test tank data, the Moorings 474 PC offers unheard of fuel efficiency at the 12 – 15 knot range and better than average efficiency at higher speeds.
